### COURSE LEARNING OBJECTIVES:

- To describe the current therapeutic options for a number of neurological conditions - anti-epileptic medications, migraine therapy, multiple sclerosis, and movement disorders.
- To appreciate therapeutic issues of relevance to children such as unintentional medication administration, emerging concerns regarding codeine usage, and increasing rates of diabetes and depression.
- To describe key issues surrounding the use of drugs in pregnancy and breastfeeding.
- To outline the impact of changes in opiate prescribing for physicians and pharmacists in Ontario, to review the role of medications in the management of sleep problems, risks for infection and cancer associated with the use of biologics, toxicological consequences of new drugs on the street, and the role of herbal medications for patients with mental health problems.

### COURSE CREDITS:

This event is an Accredited Group Learning Activity (Section 1) as defined by the Maintenance of Certification program of **The Royal College of Physicians and Surgeons of Canada** and approved by Continuing Professional Development, Schulich School of Medicine & Dentistry, The University of Western Ontario. **(6.0 hours)**

This program meets the accreditation criteria of the **College of Family Physicians of Canada** and has been accredited for up to **6.0 MAINPRO-M1** credits.

### CONFERENCE SITE:

Lamplighter Inn London. See back for directions.
